SECTION 3 - HAZARDS IDENTIFICATION  

POTENTIAL HEALTH EFFECTS  
EYES:  May cause eye damage and pain.  
SKIN:  May irritate skin.  
INHALATION:  Anesthetic.  Nervous system depression characterized by the following progressive steps: headache, dizziness, staggering gait, confusion, unconsciousness or coma. May irritate nose, throat and respiratory tissue.  
INGESTION:  Swallowing small amounts of this product during normal handling is not likely to cause harmful effects, but swallowing large amounts may be harmful.  

CHRONIC EFFECTS  
NOTICE:  Reports have associated repeated and prolonged occupational exposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.  May cause respiratory and/or skin sensitization.  
MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE  
Pre-existing eye, skin and respiratory disorders may be aggravated by exposure to this product.  
POSSIBLE ROUTES OF ENTRY  
Inhalation, ingestion, skin absorption.
CARCINOGENICITY
Ethylbenzene has been shown to cause cancer in laboratory animals. The relevance of this finding to humans is uncertain. IARC has classified ethylbenzene as a possible human carcinogen, Group 2B.

SECTION 4 - FIRST AID MEASURES

EMERGENCY FIRST AID:
EYE CONTACT: Flush at once with large amounts of lukewarm water for at least 15 minutes and get medical attention.
SKIN CONTACT: Remove from skin with soap and water. Remove drenched clothing. If irritation persists, consult a physician.
INHALATION: If affected by inhalation of vapor or spray mist, remove to fresh air. If necessary, restore breathing; in this case contact physician at once.
INGESTION: If victim is conscious, give 2 glasses of water to dilute. Do not induce vomiting. Consult physician or poison control center at once.
NOTE TO PHYSICIAN: Not Applicable.

SECTION 5 - FIRE FIGHTING MEASURES

FIRE AND EXPLOSIVE PROPERTIES OF THE CHEMICAL:
- Flammability Classification: OSHA Flammable Liquid - Class 1B
- Flashpoint: 50.0 øF
- Explosion Level: Low - 0.9
- High - 7.0

EXTINGUISHING MEDIA
Use National Fire Protection Association (NFPA) Class B extinguisher (carbon dioxide, dry chemical or foam) designed to extinguish NFPA Class 1B flammable liquid fires.

FIRE-FIGHTING PROCEDURES AND EQUIPMENT
Clear fire area of unprotected personnel. Do not enter confined space without helmet, face shield, bunker coat, gloves, rubber boots, and a positive pressure NIOSH-approved self-contained breathing apparatus. Water spray may be used to cool closed containers to prevent pressure build-up and possible explosion when exposed to extreme heat. Water may be ineffective in extinguishing a paint fire. Therefore, use caution not to spread flames with stream of water. If water is used, fog nozzles are preferable.

UNUSUAL FIRE AND EXPLOSION HAZARDS
Keep containers tightly closed. Isolate from heat, electrical equipment, sparks and open flame. Vapors may be heavier than air and may travel along the ground to distant ignition sources, then flash back to the vapor source. Keep welding or cutting equipment away from product. Containers may explode when exposed to extreme heat.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED
Remove all sources of ignition (flame, hot surfaces and sources of electrical, static or frictional sparks). Avoid breathing vapors. Ventilate area. For large spills in a confined area, use self-contained non-sparking tools. Keep out of drains, sewers and waterways.
CLEAN-UP
Contain and remove with inert absorbent and non-sparking tools.
SECTION 7 - HANDLING AND STORAGE

HANDLING
Keep away from heat, sparks and open flame. Use only with adequate ventilation. Keep from contact with oxidizing materials. Comply with all national, state, and local codes pertaining to the storage, handling dispensing and disposal of flammable liquids.

STORAGE
Do not store above 120 Degrees F. Close container after each use.

SPECIAL COMMENTS
Do not take internally. Wash with soap and water before eating, drinking, smoking or using toilet.

SECTION 8 - EXPOSURE CONTROLS, PERSONAL PROTECTION

VENTILATION
Provide general dilution or local exhaust ventilation in volume and pattern to keep TLV of the most hazardous ingredient in Section 2, below acceptable limit, and LEL in Section 5 below stated limit, during application of this product, and to remove decomposition products during welding or flame cutting on surfaces coated with this product.

RESPIRATORY PROTECTION
If personal exposure cannot be controlled below applicable limits by ventilation, wear a properly fitted organic vapor/particulate respirator approved by NIOSH for protection against chemicals in Sections (2 &/or 15).

EYE PROTECTION
Use safety eyewear with splashguards and side shields.

SKIN PROTECTION
For operations where prolonged or repeated skin contact may occur, impervious gloves should be worn.

OTHER PROTECTIVE EQUIPMENT
None required.
