SECTION IX: ENVIRONMENTAL PROTECTION

CHEMTREC EMERGENCY PHONE NUMBER 1-800-424-9300. 24 HOURS for U.S. transportation related spills, leaks, fire, exposure, or accident.

Spill or leak procedures:
Use best engineering practices when attempting cleanup of a large spill.

Larger spills:
Wear respirator and appropriate protective clothing. Stop source of leak, if possible. Dike, contain spill and recover free liquid. Prevent entry into waterways. Neutralize and/or soak up residue with an inert absorbent such as clay, sand or other suitable materials. Store and dispose of properly. Flush area with water. Where feasible and appropriate, remove contaminated soil.

Small spills:
Neutralize and/or soak up spill with an inert absorbent such as clay, sand or other suitable material. Store in a closed container and dispose of properly.

Regulatory spill reporting requirements may apply. Contact governmental agency or legal counsel for advice.

Waste Disposal Method:
If discarded as supplied, material meets RCRA characteristic definition of corrosivity, 0002. The toxicity characteristic has not been evaluated. Under RCRA, the applicable hazardous waste classification must be evaluated prior to disposal of the material. Use of the product, processing contamination may render the resulting material hazardous or alter waste classification.

All recovered material should be packaged, labeled, transported, and disposed of or reclaimed in accordance with local, state and Federal regulations regarding air pollution, water pollution or health.

CAUTION: Improper disposal or reuse of the empty container may be hazardous and illegal. Cutting or welding of empty containers may cause explosion or toxic fumes from residues. Do not pressurize or expose to open flame or heat. Keep container closed and drum bungs in place. RE to applicable governmental standards.
