CONSTRUCTION TRAFFIC ALERT!

Due to construction activities that will begin within the next few days. Please take note of the following campus traffic impacts:

Installation of underground utility piping for the new Food Services Facility will require additional traffic impacts to the South Campus area. For a two week period workers will be performing above ground pipe welding on a pair of +/- 600 foot long sections of pipe that will be pulled/pushed underground from the new Food Services Facility to a connection point behind the Gleason Center for Performing Arts. The main traffic impact as shown below will be to the actual construction vehicle flow and to approximately 8 parking spaces between the Allen S. Henry Building and the Nathan M. Bisk College of Business.

For Additional Information Please Call 674-8038. Thank You.
